SLYCE360

Grab a bigger slyce of the recurring payments pie

Manage Your CNP Recurring Payments All in One Platform

Informed by 30 years of CNP RP merchant experience

Suspect you're wasting money on dispute mitigation fees? Analyze all your dispute and mitigation efforts, holistically. Slyce360 will point to where you might be wasting money with duplicate or ineffective coverage, double refunds, or intentionally misapplied dispute mitigations that allow for chargebacks of more recent transactions

Worried about a rogue distributor or affiliate that could torch an acquirer relationship or bring down your business? Quickly identify a sales partner that could be exposing your company to regulatory, compliance and/or reputational risk that could cost you millions of dollars. Spot them before they become a problem too big to fix

Confused by the ever-changing authorization response codes you're receiving and their impact on your authorization strategies? There's gold in those codes. Slyce360 identifies and monitors unique patterns or troubling shifts in your response codes to better inform your authorization strategies and dramatically boost customer name value

Frustrated by poor quality or confusing acquirer reporting? Mitigated disputes are being counted as chargebacks and triggering an audit. Missing or incomplete fraud reporting can derail your compliance efforts. Slyce360 ingests all your payments data, and cleanly presents the outputs in a series of configurable dashboards. This allows you to take deep dives into trouble spots, all through a single, leading-edge portal

Concerned about breaking one of the dozens of constantly changing association or acquirer thresholds? Daily alerts signal any potential looming issues within your chargeback and fraud data. System-generated Insights help you navigate away from the myriad risk and compliance trip wires set for CNP RP merchants

Slyce360 is engineered to work seamlessly with your CRM and payments data. Spend less time on representments, and substantially lift your win rates with Slyce360

### Imagine a platform that allows you to better manage all aspects of your CNP recurring payments

Slyce360 provides dispute mitigation ROI analysis

Optimize your authorizations with Slyce360

Get automated, predictive compliance reporting and warnings

Ask your processor, ISO, or payments enabler if they offer Slyce360. If not . . . ask them to reach out to **info@slyce360.com** to join the future of CNP recurring payments optimization
